

## November is Financial Literacy Month

Pay grids. Pension contributions. Deferred leaves. These are all factors *unique* to education members. And each of these factors plays an important role when it comes to your overall financial journey.

This month, take time to empower yourself and invest in your own financial wellbeing. By being financially literate, you can better manage life events such as buying your first home, having a child, or retiring early.

Check out these upcoming events and educational resources to help strengthen your financial literacy and make more informed decisions about your money:
